Project Title

Campus Food Ordering System

Short Description

A web-based application that lets AIUB students browse the campus canteen menu, search and filter food items, add them to a cart, place orders online, and track order status in real time, while giving administrators tools to manage the food menu, monitor sales, and oversee users and orders.

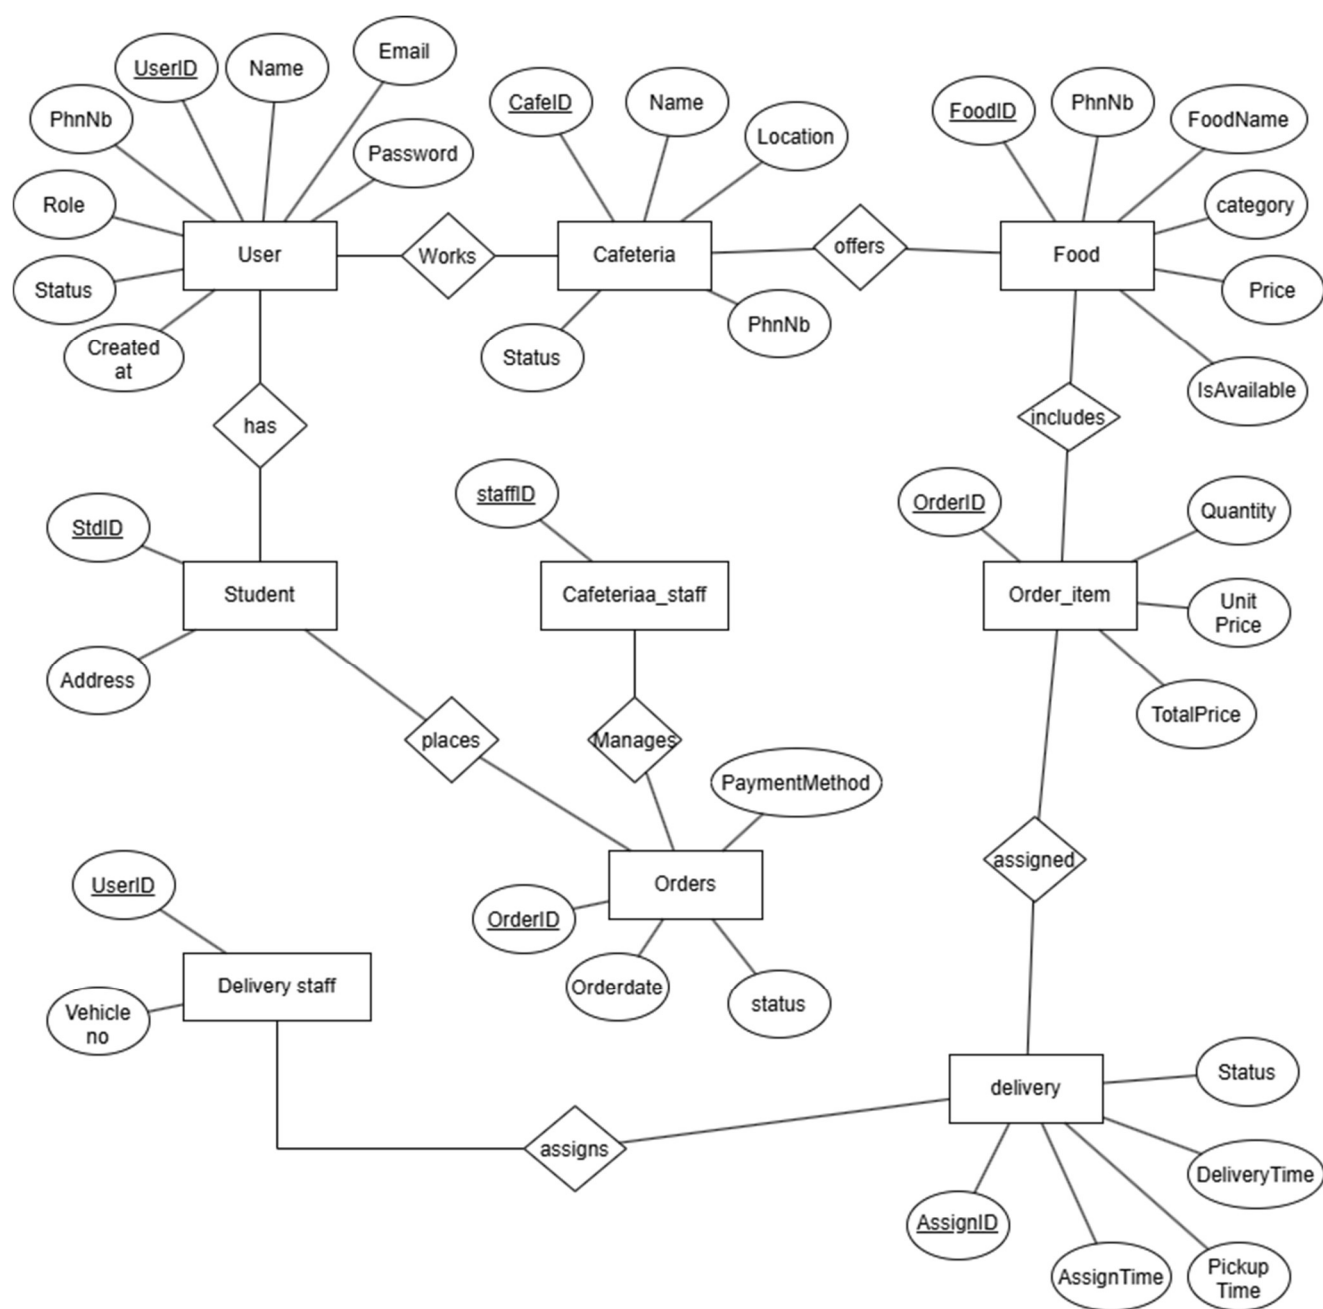

Introduction

Long queues at the campus canteen during peak hours make it difficult for students to order food quickly between classes. The Campus Food Ordering System is a PHP and MySQL based web application that digitizes this process: students can register, log in, browse the food menu, add items to a cart, place an order, and track its status from anywhere on campus, while admins manage the menu, monitor orders, and view sales through a dedicated dashboard.

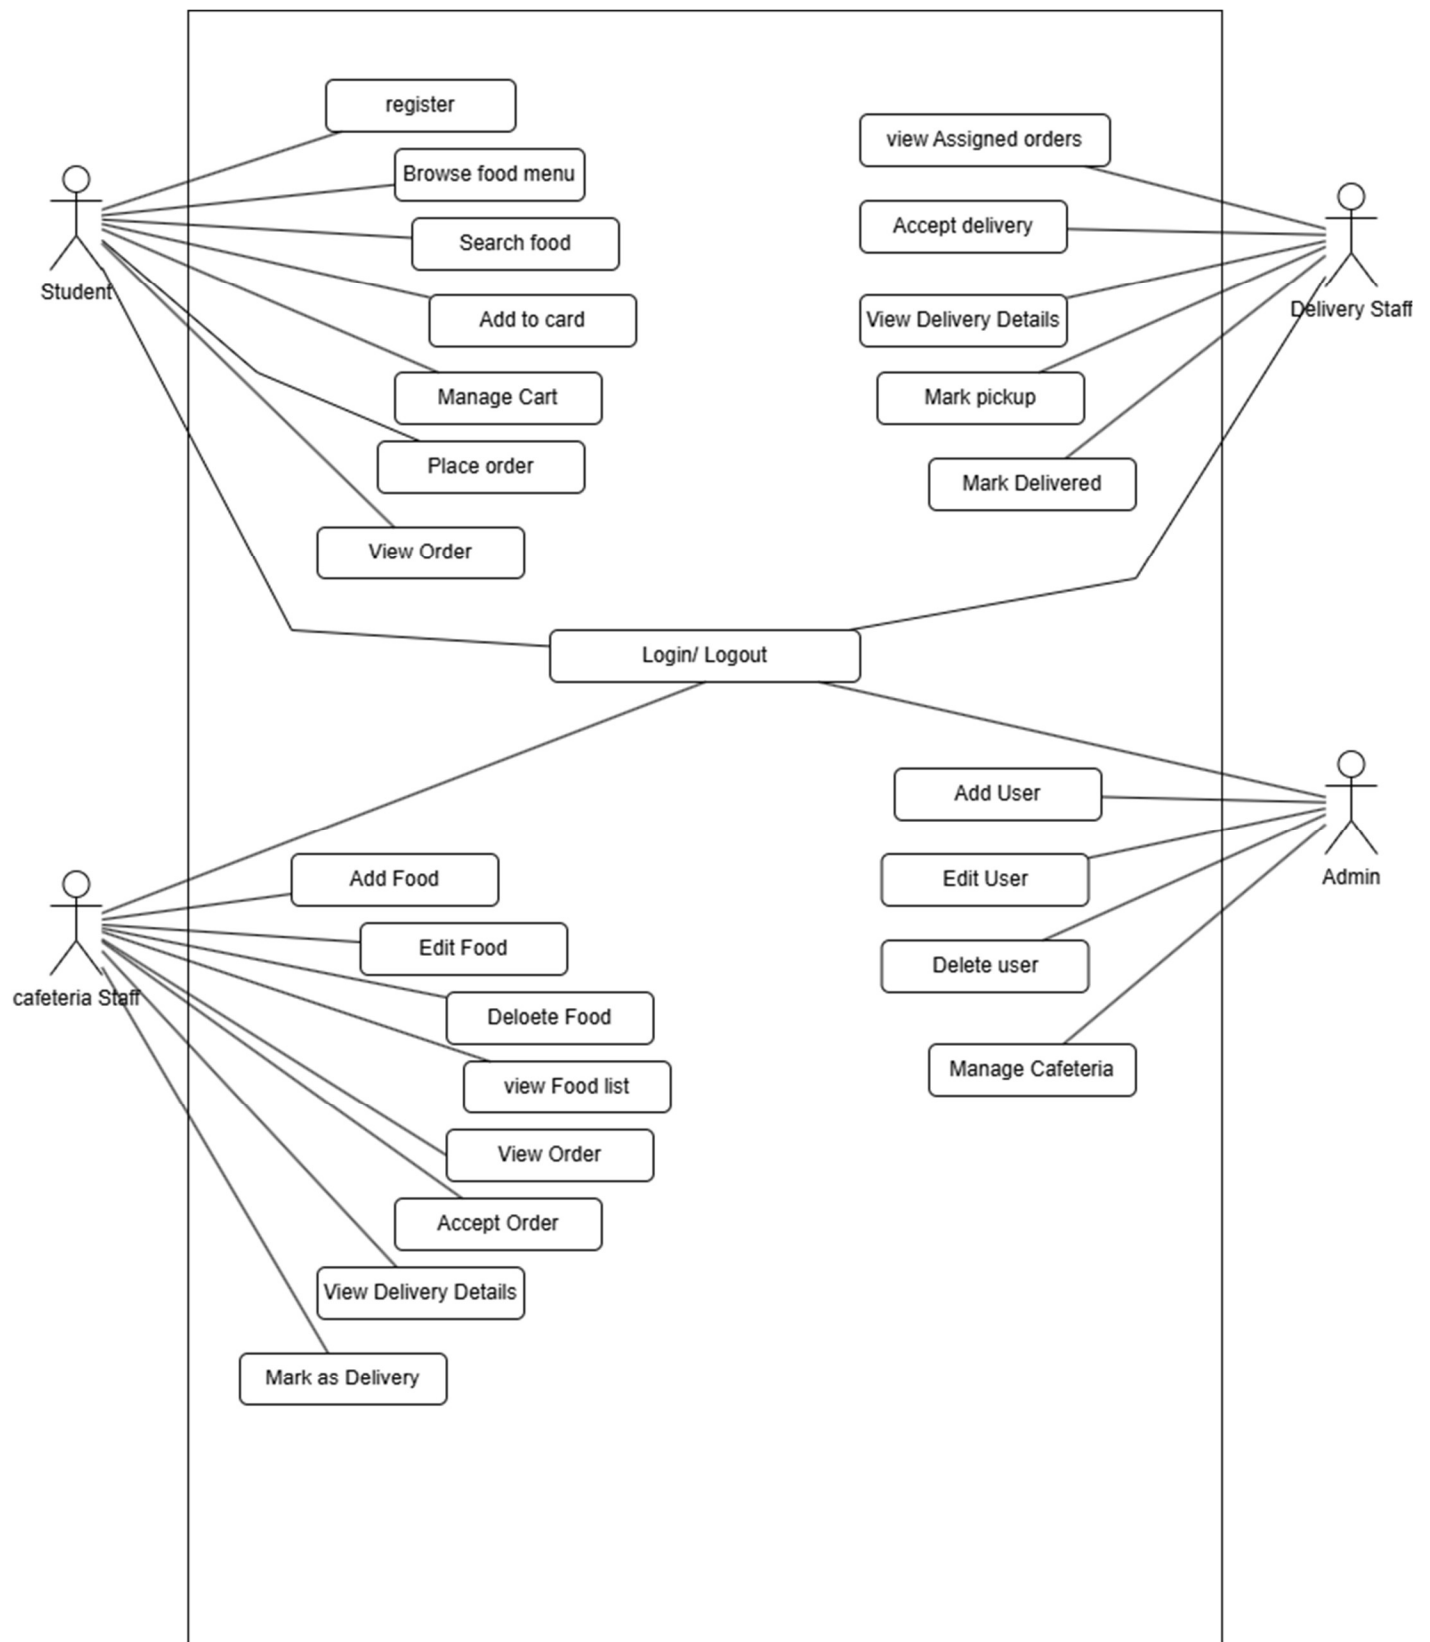

Background Study

Manual, in-person food ordering at university canteens leads to long waiting lines, order mistakes, and no easy way for students to check food availability or prices before joining a queue. Similar campus food ordering and online food delivery systems have shown that moving ordering online reduces waiting time and improves accuracy. This project applies the same idea to the AIUB campus canteen, using core web technologies (PHP, MySQL, JavaScript) covered in CSC 3215 to build a practical, role-based ordering platform for students and admins.

Use Case Diagram

UI (Figma/Sketch)

The login screen features a white card centered on a light blue background with a faint architectural pattern. At the top of the card is the CampusBite logo, consisting of a green square with a white fork and knife icon, followed by the text "CampusBite". Below the logo, the heading "Welcome back" is displayed in bold, followed by the subtext "Log in to order fresh meals from your cafeteria". The form includes two input fields: "Student Email or ID" with a placeholder "e.g. 2021-1-60-001" and a magnifying glass icon, and "Password" with a placeholder "*****" and a toggle icon. Below these fields are a "Remember me" checkbox and a "Forgot Password?" link. A large green "Login" button is positioned below the form. At the bottom of the card, a link "Don't have an account? Create Account" is provided. A dark grey navigation bar at the very bottom of the screen contains a left arrow, the text "1/3", and a right arrow. In the bottom right corner of the screen, there is a small "Reset" button with a circular arrow icon.

The registration screen features a white card centered on a light blue background with a faint architectural pattern. At the top of the card is the CampusBite logo, consisting of a green square with a white fork and knife icon, followed by the text "CampusBite". Below the logo, the heading "Create student account" is displayed in bold, followed by the subtext "Register to access custom menus & online payments". The form includes four input fields: "Full Name" with a placeholder "e.g. Rafiqul Islam" and a magnifying glass icon, "Student ID" with a placeholder "2021-1-60-045" and a green checkmark icon, "University Email" with a placeholder "e.g. rafiq.islam@ewubd.edu" and an envelope icon, and "Password" with a placeholder "*****" and a toggle icon. Below the password field are two green checkmarks and their respective requirements: "At least 8 characters" and "Must contain a number and special character". A "Confirm Password" field with a placeholder "*****" and a toggle icon is located below the password field. A large green "Register" button is positioned below the form. At the bottom of the card, a link "Already have an account? Login" is provided.

Types of User: 1. Student 2. Admin 3. Cafeteria Staff 4. Delivery Staff

- **Authentication**

1. Login to the system
2. Logout from the system
3. User registration

- **Account Management**

1. Change or reset password
2. Manage profile information (view, edit, delete)

- **Dashboard**

1. Access a personalized dashboard after login

Specific Features by User Type

Features of Student

1. Browse the food menu with categories and food details, and search/filter items by name, category, or price
2. Manage a shopping cart: add food, remove food, change quantity, with the total calculated automatically
3. Check out and place an order, with the order confirmed and stored in the database
4. View order history, including order details, total amount, and date/time
5. Track order status in real time (Pending, Preparing, Ready, Completed, Cancelled)

Features of Admin

1. Manage the food menu: add, edit, or delete food items and update price/availability
2. Update order status as orders progress (Pending, Preparing, Ready, Completed, or Cancelled)
3. View an admin dashboard showing total users, total orders, total sales, and pending orders
4. View all registered users, activate/deactivate accounts, and manage user roles

Features of Cafeteria Staff

1. Add/Edit/Delete Food: Basic CRUD operations allowing staff to Add Food, Edit Food, Delete Food, and View Food items in the menu.
2. View Orders: Staff sees order details such as Order ID, items with quantities, total price, and the ordering student (e.g., *Order #101, Chicken Burger × 2, Total: ₹300, Student: Rahim*).
3. Update Order Status: Sequential progression through 3 status steps: Pending → Preparing → Ready.

Feature of Delivery Staff

1. View Ready Orders: Delivery staff views a filtered list containing only orders marked with the Ready status.
2. Accept Delivery: Single-click interaction to Accept an available ready order, which maps/assigns the delivery task to that specific delivery person.
3. Mark as Delivered: Final status update option to change the order status to Delivered once the drop-off is complete.

N.B: Each user type must have at least 3 distinct features different from the others. Additional features may be added if desired. Proposals with generic, incomplete, or duplicated features across user types will receive reduced marks under the criteria below.
